PROFESSIONAL SUMMARY

High-impact **Software Engineer** with 2 years of experience building **scalable, distributed backend systems in Go on AWS**. Proven track record architecting **cloud-native, event-driven services, optimizing infrastructure**, and **delivering high-performance APIs**. Drove a **60% reduction in cloud costs** through architectural redesign and efficient system design.

PROFESSIONAL EXPERIENCE

WMS (White Martech Solutions Pvt Ltd)

SDE I, Bangalore, India

June 2025 – Present

Intern, Bangalore, India

July 2024 – May 2025

- Architected a **multi-tenant, Go-based voucher issuance platform** using an **event-sourced transaction ledger** with **optimistic locking and idempotency** to eliminate concurrent double-spending.
- Implemented **reliable webhook delivery**, bulk operations, and scoped **multi-actor authentication** for secure platform access.
- Developed a **payment gateway orchestrator** integrated with **Razorpay**, designed for provider extensibility and **handling 90% of company transactions**.
- Engineered **ledger tracking, refunds management**, and **reliable webhook processing** with **automated retry mechanisms**.
- Built a **pluggable background worker framework** supporting **AWS SQS/GCP Pub-Sub** to streamline bulk operations and order lifecycle automation.
- Implemented comprehensive **monitoring & alerting systems** while integrating **10+ partners** into the digital voucher platform.
- Migrated API Gateway-facing Lambda functions to an **Application Load Balancer (ALB) architecture**, achieving a **60% reduction in operational costs**.
- Developed a proprietary **Tiny URL service** with **deferred deep linking** to replace Firebase Dynamic Links.
- Engineered **custom decision pages** for intelligent user routing and improved campaign conversion.
- Integrated over **10 external gaming APIs** for automated **campaign verification** and real-time milestone monitoring.
- Developed **retention mechanisms**, including reward multipliers, bonus incentives, and **geofenced quest parameters**.

TECHNICAL SKILLS

Languages: GoLang, JavaScript, TypeScript, Python, Java, C, HTML/CSS.

Backend: Go, Chi, Mux, Node.js, Express.js.

Database: DynamoDB, Redis, MongoDB, MySQL.

Cloud & DevOps: AWS (EC2, Lambda, ALB, CodeBuild, CloudWatch), Docker, Git, GitHub.

PROJECTS

Full Stack Project- Coding Playground: [Github link](#)

- Developed a full-stack Online Code Editor using **Docker containerization** for isolated code execution.
- Integrated an **in-browser terminal (Xterm.js)** and a **persistent virtual file system** for user projects.
- Utilized **WebSockets** for seamless real-time frontend/backend synchronization.
- Designed a UI with **resizable and minimizable components** to enhance developer flexibility.
- **Tech Stack:** React, TypeScript, Node.js, Express, Docker, WebSockets, Monaco Editor, Xterm.js, AWS EC2.

Backend Project- Video platform: [Github link](#)

- Developed a scalable Video Streaming Backend API (Node.js/Express.js) focused on **CRUD operations** for channel management, secure media resource handling, and core engagement features.
- Implemented **JWT-driven authentication** for secure session management and credential integrity.
- Designed **NoSQL aggregation pipelines** to optimize **query latency** and platform scalability.
- **Tech Stack:** Node.js, Express.js, MongoDB, JSON Web Tokens.

ACHIEVEMENTS

- ❖ **GATE (CS) 2024 Qualified:** Achieved a score of 436.

EDUCATION

Bachelor of Technology Dr. APJ Abdul Kalam Technical University, Lucknow	2021-2025
Intermediate Saraswati Academy, Haldwani, Uttrakhand	2020-2021
High School Saraswati Academy, Haldwani, Uttrakhand	2018-2019

EXTRA-CURRICULAR ACTIVITIES

Student Coordinator United Diploma Sports Fest 2022-23, Prayagraj	Jan 2023
Tech Leader United Badminton League, Prayagraj	Nov 2022
